Molecular Breeding of Forage and Turf Andrew Hopkins,Zeng-Yu Wang,Rouf Mian,Mary Sledge,Reed E. Barker,2006-04-11 Forage and turf are the backbone of sustainable agriculture and contribute extensively to the world economy. The fast-paced advancement of cellular and molecular biology provides novel methods to accelerate or complement conventional breeding efforts. This book contains the most comprehensive reviews on the latest development in applications of molecular techniques for the improvement of forage grasses, forage legumes and turf grasses. Detailed accounts and future opportunities in molecular breeding of forage and turf, from gene discovery to development of improved cultivars, are described in the book. Almost all relevant areas are explored in detail, including tolerance to biotic and abiotic stresses; flowering control; plant-symbiont relations; breeding for animal, human and environmental welfare; molecular markers; transgenics; bioinformatics; population genetics; genomics of the model legume *M. truncatula*; field testing and risk assessment as well as intellectual property rights. This book will be of interest to researchers in both academia and industry who are involved in forage and turf improvement. It will be especially important to breeders, molecular biologists, geneticists, physiologists and agronomists.

Handbook of Ugaritic Studies Wilfred Watson,Nicolas Wyatt,2016-02-15 All aspects of the ancient site of Ras Shamra (Ugarit) are treated in this compendium: discovery, decipherment of script, interpretation of literary, diplomatic and legal texts, as well as analysis of languages, history, religion and iconography. Cyrus Gordon called its archives 'the foremost literary discovery of the twentieth century' and they have undoubtedly revolutionized our knowledge of the background to Greek, Phoenician and Israelite culture.

Becoming Elektra Mick Houghton,2010-09 An account of Elektra Records in the Jac Holzman years, from 1950 to 1973, Becoming Elektra tells the story of the label's growth from a small folk label to a major hit-making concern. Jac Holzman's role in founding and running the company is central to the story, and his capacity for the lateral thinking that led to innovations such as the first-ever sampler album and a million-selling series of sound effects records is a recurring theme. Opening with the moment that Holzman discovered The Doors, the story then goes back to the '50s, when the label brought folk music to a wide audience through artists such as Jean Ritchie, Josh White, Theodore Bikel, and Bob Gibson. Moving into the '60s and '70s, the story covers artists that read like an inventory of musical innovation: Love, Judy Collins, Tim Buckley, Fred Neil, David Ackles, Phil Ochs, Bread, Queen, Mickey Newbury, The Incredible String Band, Carly Simon, The Stooges and The MC5.

The Excavation of the Prehistoric Burial Tumulus at Lofkend, Albania Lorenc Bejko,Sarah P. Morris,John K. Papadopoulos,Lynne A. Schepartz,2015-12-31 The burial tumulus of Lofkend lies in one of the richest archaeological areas of Albania (ancient Illyria), home to a number of burial tumuli spanning the Bronze and Iron Ages of later prehistory. Some were robbed long ago, others were reused for modern burials; few were excavated under scientific conditions. Modern understanding of the pre- and protohistory of Illyria has largely been shaped by the contents of such burial mounds. What inspired the systematic exploration of Lofkend by UCLA was more than the promise of an unplundered necropolis; it was also a chance to revisit the significance of this tumulus and its fellows for the emergence of urbanism and complexity in ancient Illyria. In addition to artifacts, the recovery of surviving plant remains, bones, and other organic material contribute insights into the environmental and ecological history of the region.

Assembling Enclosure Ronan O'Donnell,2015-11-16 The landscape history of North-East England has not been studied as much as other parts of the country. This book begins to fill this gap by utilizing Actor-Network Theory (ANT) to re-assess the familiar topics of enclosure and improvement. It reveals the contribution of local 'actors' - including landowners, tenants and the landscape itself - to these 'processes'. In so doing it transforms our understanding of the way in which the landscape of Northumberland was created during the eighteenth and nineteenth centuries and carries wider implications for how we might approach enclosure in other parts of the country.

Culture of Peace Alan Kreider,2005-11-01 Why is peace such a divisive issue, even among Christians? Why is it so hard to practice right here right now? Why is peace often considered an extra, rather than an essential, to faithful Christian living?

The three authors decided to write this book when the Indonesian member of the team remarked to the other two: If the Christian church is to make any impact on Indonesia, it must address itself to the biggest peace issue -- reconciliation with Muslims. But before the writers could honestly consider that explosive possibility, they first had to ask why Christians find it so difficult to live peaceably with other Christians. They've discovered that conflict is often a prerequisite of peace. They grant that peace is a continuum -- easier to live in some areas of life than in others. They've learned that peace has two parents -- hard work and grace. Living in peace is muscular activity. The authors suggest how to develop peacemaking reflexes; how churches can learn to handle conflict well; and how to cultivate vulnerability and humility, two essential attitudes of peacemakers. True stories from communities around the world support this hopeful but strenuous call to faithful living.
